

Programming and Problem Solving through Python Practical (PR3)

JAN 2025

- 1- Create an array from [10, 15, 20, 25, 30]. Use Boolean indexing to create a new array with elements greater than 15.
- 2- Write a program that opens a file named data.txt in write mode, and writes multiple lines to it from a list of strings.
- 3- Write a Python program to check whether an element exist within a tuple.
